

Dräger Technology – Supported by ICON.

Did you know your Dräger technology comes with its own ICU support staff? It's called ICON, and it is exclusive to Dräger for Ventilation.

In emergency care, perioperative care, critical care and perinatal care environments, Dräger Medical Inc. provides industry-leading acute care patient solutions to healthcare facilities around the world.

Dräger is committed to providing both the best technology in the industry and the best clinical support to go with it. That's why Dräger has partnered with ICON to provide 24x7 clinical and educational support for your Dräger ventilation equipment.

What does ICON support mean to your staff?

ICON's 24x7 support line provides immediate, live support for Dräger ventilator technologies. Should any member of your ICU team have a question about your Dräger ventilator equipment, experience an alarm situation, or simply want to be walked through a procedure, the ICON staff is standing by to provide expert assistance.

With ICON providing support, your clinical staff will not only feel more confident and competent using ventilator technology, they'll also make fewer errors and will be able to focus more on patient care.

Experts on-call

ICON support specialists have extensive experience with Dräger technologies. In assisting clinicians and respiratory therapists around the country every day – ICON tracks the most common questions and issues that arise. Access to that dynamic knowledgebase of real-world issues enables us to troubleshoot and resolve problems quickly and expertly.
